- Web based systems— accessible from any web enabled PC
- Constant focus on improving systems while maintaining cost savings for our customers
- Ongoing, 24 / 7 support for the life of the system*

* upon payment of yearly maintenance fee

A properly trained workforce is key to any successful business. The Nysus Solutions On the Job Training (OJT) System provides employers with a mechanism to ensure all associates have received proper training. Typical applications include safety training, standardized work, certifications and orientation. The system also ensures the communication of process, quality, safety and material alerts and documents once associates have reviewed them.

OJT System benefits include:

- ➔ Documents all training activities
- ➔ Highlights deficiencies in cross training
- ➔ Ensures only qualified associates are performing any given function
- ➔ Provides reminders for training or certifications that must be renewed
- ➔ Integrates to MES to ensure operators are trained to perform job functions at designated stations

Standard reporting features:

- ➔ Email notification of upcoming training requirements
- ➔ Display of qualified associates by function or area
- ➔ Reporting of training by employee

OJT/Alerts - Recent Qualifications Report

This report shows recent job qualifications.
